WORK EXPERIENCE

Software Development Engineer - I Valuebound

Dec, 2021 - Apr, 2023

- Contributed to the R&D team developing management software and Delivered projects on time.
- Collaborated on requirements, design, coding, testing, documentation and deployment.
- Achieved efficient solutions through code reviews and optimizations.

Software Engineer Trainee Valuebound

Sep, 2021 - Dec, 2021

- Acquired front-end, back-end, and API integration skills.
- Intensive MERN stack training, hands-on mini projects.

PROJECTS

Real-time Chat Application (April, 23)

- Fullstack Developer** - Designed and developed a real-time chat app with React.js, Node.js, Redis, Socket.io, and TailwindCSS. Enabled seamless communication, responsive UI, and secure data transmission.

SurveyPOC (Sep, 22 - Nov, 22 - 3 months)

- Team Lead** - Spearheaded the development of SurveyPOC, an innovative add-on application integrated with any React app, enabling the creation of surveys and seamless preservation of survey statistics.

Grow10x - OKR Portal (May, 22 - Dec, 22 - 7 months)

- Full-Stack Developer** - Implemented and optimized the database architecture using MongoDB, and subsequently spearheaded the development of the user interface using React.js and Redux, contributing to the Grow10x OKR Portal's performance management and career improvement functionalities.

Legiview (Mar, 22 - May, 22 - 2 months)

- Back-end Developer** - Implemented back-end functionality and database management for Legiview - Interview Feedback System using the MERN stack, enabling efficient note-taking, candidate rating, and candidate history storage for improved hiring decisions.

OnBoard Aggregator (Feb, 22 - 1 month)

- Full-Stack Developer** - Developed the Redmine module of an automated system enabling users to effortlessly create multiple development platforms accounts through a single customized form using MERN stack technologies.

Oneplace-ERP (Dec, 21 - Mar, 22 - 3 months)

- Back-end Developer** - Implemented backend functionality and API integration using the MERN stack for Oneplace-ERP, a centralized application by Valuebound to streamline operational processes and serve as a primary touchpoint for all employees.

EDUCATION

Bachelor of Technology Bengal Institute Of Technology

06/2017 - 07/2021

Kolkata

- Information Technology

SKILLS

JavaScript

React.js

Node.js

Express.js

MongoDB

Redis

Java

Next.js

TailwindCSS

TypeScript

Docker

Fastify

Socket.IO

Agile methodologies

Natural Language Processing

ACHIEVEMENTS

Published a blog on the implementation of Redis in Node.js, covering key concepts and best practices

The blog was nominated by the company and subsequently published on its official website, reaching a broader audience of developers and receiving positive feedback.
